PROFESSIONAL SUMMARY

Java Developer with 11 months of hands-on experience (5 months as a Software Developer, 6 months as a Java Developer Intern) building secure, scalable backend systems using Java, Spring Boot, Spring Security, and Hibernate (JPA) with MySQL. Skilled in designing RESTful APIs, relational database schemas, and transactional business logic. Experienced with Linux server administration, Nginx, GitHub Actions CI/CD, and production deployment. Comfortable working across the stack when needed (Next.js, React.js) but focused on backend engineering, clean architecture, and maintainable code in Agile teams.

KEY HIGHLIGHTS

- Currently building and deploying live production platforms (veaglespace.com and br.veaglespace.com) end-to-end — from API design to Linux/Nginx deployment.
- Delivered the ValueXpert Chartered Accountant client website (valuexper.in), handling both backend APIs and production VPS deployment.
- Built and shipped a cross-platform mobile app to the Google Play Store and App Store.
- Hands-on with the full backend lifecycle: schema design, secure REST APIs, transaction management, and CI/CD.

AI-Assisted Dev: GitHub Copilot, Cursor, ChatGPT (code generation, debugging, code review)

PROFESSIONAL EXPERIENCE

Veagle Space Pvt. Ltd. — Backend Developer & Deployment Engineer

March 2026 – Present | Pune, MH | Java, Spring Boot, Spring Security, Hibernate (JPA), MySQL, Next.js

- Led backend development of the Veagle Space platform (veaglespace.com) and a second business platform (br.veaglespace.com), using Java, Spring Boot, Hibernate (JPA), and MySQL.
- Delivered the ValueXpert Chartered Accountant client website (valuexper.in) — backend APIs and production VPS deployment via Nginx and GitHub Actions.

- Developed a cross-platform mobile app (React Native/Expo) for the Attendee Event Management client platform, integrated with existing RESTful APIs, and managed Google Play Store / App Store releases.
- Designed and implemented secure RESTful APIs for core business modules with Spring Security, and optimized relational database schemas for performance and scalability.
- Deployed and maintained production applications on Linux VPS environments using Nginx and GitHub Actions CI/CD.

Creazione Software — Java Developer Intern

6 months | Java, Spring Boot, MySQL

- Assisted in developing and maintaining Java-based backend modules under senior developer guidance.
- Wrote and tested RESTful API endpoints and supported database schema design using MySQL.
- Participated in code reviews, debugging, and Agile sprint ceremonies to deliver features on schedule.

PROJECTS

Slot Booking System — Java, Spring Boot, Spring Data JPA, MySQL

- Built a slot booking system with real-time availability validation using Spring Boot and Hibernate (JPA).
- Prevented race conditions and duplicate bookings using transactional management and backend validation logic.
- Designed a relational schema for slots and bookings ensuring data consistency under concurrent requests.

Product Recommendation Web Application — React.js, Node.js (Express), MySQL

- Built a recommendation engine processing 500+ product records using category- and item-to-item logic.
- Developed an Admin Panel with full CRUD for 50+ products across 10+ categories.
- Implemented cart, purchase flow, and order tracking used by 30+ test users.
